

KÄRCHER

TOO MUCH TO CLEAN WITH LIMITED STAFF?

There's Kärcher for that. Innovative and efficient cleaning solutions to assist custodians in maintaining school grounds.

[Kärcher.com/us](https://www.karcher.com/us)

PROFESSIONAL | EDUCATION

THE BEST IN THEIR CLASS.

BVL battery-powered backpack vacuum

No concessions or limits, just power: reach all areas with the ultra-light, powerful, battery-powered BVL 5/1 Bp backpack vacuum – even when cleaning in the narrowest of spaces. All without having to wind up or unwind the power cable, drag it behind you or endless replugging.

B 50 walk-behind scrubber

The B 50 W Bp compact scrubber is ideal for efficient floor cleaning and boasts a particularly durable design. The brush head and squeegee are made from long-lasting cast aluminum – for excellent suction even on textured surfaces and in tight corners.

KM 85/50 R Ride-on Sweeper

Compact, agile and intuitive, this battery-powered sweeper is perfect for confined and congested areas. Ideal for cleaning narrow corridors, it's easy to operate and maintain, boasting impressive area performance outdoors.

Schools aim to grow smart and successful students. Better attendance is a result of a clean learning environment. Our mission is to assist you with planting the seed for success. Use Kärcher's extensive line of scrubbers, sweepers, pressure washers, and steam cleaners to create a safe and clean environment for your staff and students alike. Your team will complete tasks more quickly, efficiently and effortlessly. Plus, Kärcher service provides ongoing support when you need it.

CVS carpet sweeper

Cleaning with a vacuum cleaner can be hard work and take time. We can help. The battery-powered CVS 65/1 carpet sweeper gives you high cleaning performance and is easy to operate. It can help you clean long corridors and large carpeted areas quietly and without interruptions.

Sensor® S2 HEPA vacuum

The Sensor® S2 HEPA vacuum excels in cleaning performance and reliability. With standard HEPA filtration, it ensures optimal indoor air quality. Lightweight and quiet, it's perfect for noise-sensitive environments. Experience unparalleled cleaning power and dependability

KIRA autonomous scrubber

The perfect addition to any cleaning team: the KIRA B 50 cleaning robot with intuitive operation and powerful sensors offers complete autonomy for high productivity and outstanding safety. Free up your staff to focus on higher value tasks with autonomous cleaning.

AUTONOMOUS CLEANING.

Free staff from monotonous floor cleaning to focus on other high-priority tasks. The KIRA CV 50 vacuum and KIRA B 50 scrubber are your autonomous cleaning solution. With intuitive controls and powerful sensors, these machines clean hard floors, carpets, and everything in between—safely and efficiently. KIRA allows you to reassign staff to those tasks they never quite find time to do. All while helping reduce labor costs, and relieving custodian fatigue. Explore our KIRA models and find the perfect one for your facility.

Explore our KIRA
Cleaning Solutions:

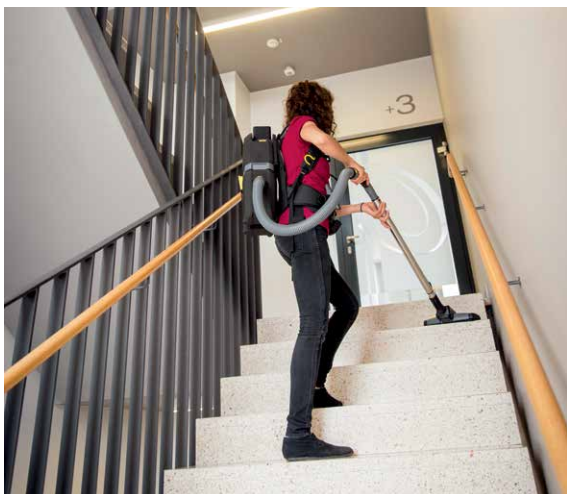

STUDENTS WELCOME, DIRT NOT SO MUCH.

Foot traffic brings the outdoors in.

A clean, well-maintained outside area is the start to keeping floors inside clean. With our cleaning solutions, you can keep entryways, access paths, sidewalks, bus parking areas and delivery areas neat and inviting year round.

Consistent cleaning of the outside area noticeably reduces the amount of dirt entering the building. Additional walk-off zones at all entrances complete the preventive protection against dirt.

KM 70/20 Walk-Behind Sweeper

Speedy sweeping and painless maintenance rolled into one convenient package. This manual push sweeper is rugged and built for long life. The dust filter prevents dust from flying up during sweeping.

Less dirt ingress has a direct impact on the cleaning needs inside the building. Wear marks on the floors are reduced, value preservation is increased and time freed up can be used for other cleaning tasks.

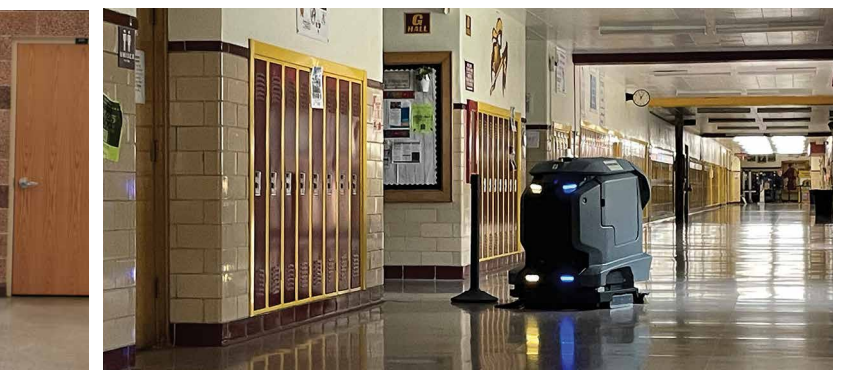

We offer efficient and productive cleaning options so you can provide a relaxing space for staff and students alike. A clean environment also positively impacts student learning and well-being, not to mention the obvious safety concerns.

Traditional mopping is slow and inefficient for large school areas. Kärcher floor scrubbers offer a significant upgrade, speeding up cleaning on hard floors by scrubbing and drying in one pass, moving beyond the limitations of mops and buckets.

Kärcher's fully autonomous scrubber further enhances efficiency. This technology provides consistent, unattended cleaning, freeing up custodial staff for other important tasks.

BD 80/100 W Bp Classic Scrubber

This economically-designed scrubber provides all the cleaning power to take on large jobs. With a 32-inch cleaning path, it will shorten the cleaning time for scrubbing floors.

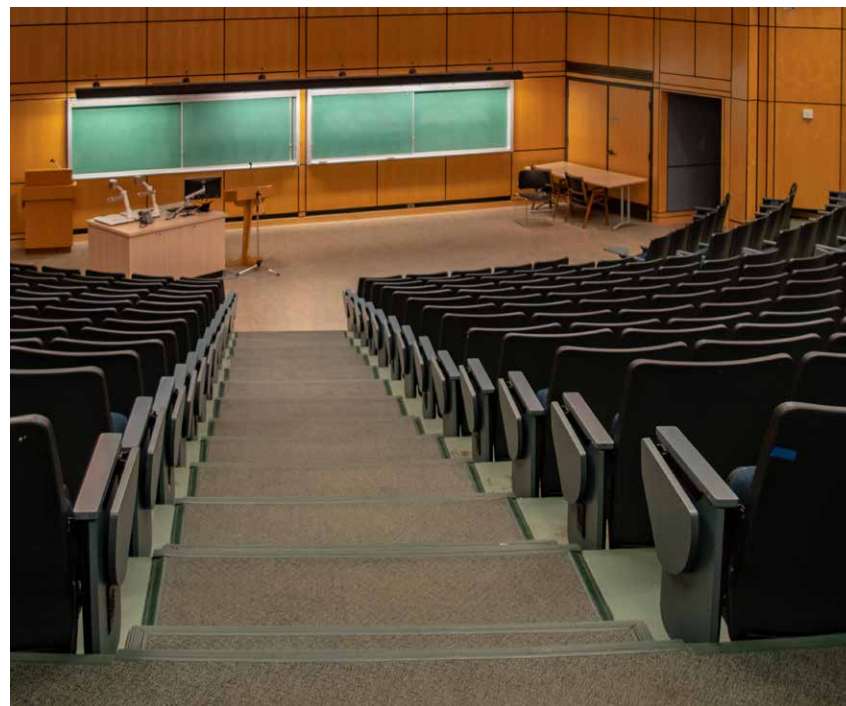

A VERSATILE CLEAN SWEEP.

Throughout a school, floors can be as versatile and unique as each and every student – and therefore need the cleaning requirements to match.

While hard flooring may be the clear winner when it comes to square footage, carpeted auditoriums, offices, libraries and lounges need quick

and easy cleaning solutions. Kärcher's versatile KIRA CV 50/1 autonomous vacuum can traverse between hard and soft flooring with ease.

Vacuum with ease

While quick and ergonomic equipment makes cleaning staff happy, excellent results are a must. Our upright vacuums come corded or battery powered, with our backpack vacuums giving the operator the utmost freedom to easily navigate around desks and seating rows.

Deep cleaning carpets

Interim and deep cleaning care is needed to refresh carpet to bring life back to the fibers. It's much easier with the walk forward extractor (which we invented!), making cleaning more ergonomic for custodial staff.

Armada® Walk-Behind Extractor

Self-propelled, walk-forward extraction improves productivity anywhere from 30-60% over a conventional extractor and reduces drying time. A front runner is the Armada® BRC 45/38 W with its steerable head and excellent maneuverability.

A man in a light blue polo shirt and brown trousers is operating a black and yellow Kärcher floor cleaning machine on a tiled floor in a cafeteria. The machine has a long handle and a large cleaning head. In the background, there are cafeteria counters, a glass display case, and various kitchen equipment.

SERVING FRESHNESS AND CLEANLINES.

Ensuring cleanliness in kitchens and cafeterias is of the utmost importance. That's why Kärcher provides everything you need to efficiently and professionally clean while adhering to strict hygiene regulations.

The cafeteria holds a special place for students, serving as a beloved sanctuary to gather for lunch, catch up with friends and enjoy a short respite from learning. The constant need for

cleanliness to prevent the spread of unwanted germs and bacteria is no easy feat, but much easier to face with Kärcher's floor scrubbers, wet/dry vacuums and steam cleaning equipment.

Kitchens and cafeterias

Whether you are preparing food or consuming it, hygiene is of paramount importance in all food-related areas. At Kärcher we trust in targeted steam cleaning in

kitchens without using chemicals. Scrubbers and wet/dry vacuums help combat food residues and crumbs on seats and flooring, while preventing slip and falls by allowing debris and spills to be cleaned quickly.

SG 8/5 Classic Steam Cleaner

This easy-to-use tool is a steam cleaner and wet vacuum cleaner in one. It's easy to operate and the unique design allows you to refill water while in use.

CONTROLLING THE SPREAD OF GERMS.

Extensive cleaning and disinfecting can be so simple – even in school restrooms.

Cleaning restrooms is crucial for maintaining student health, as they are high-traffic areas where germs and bacteria can easily spread.

Additionally, clean and well-maintained restrooms enhance the reputation and overall satisfaction of your facility.

Full steam ahead to tackle dirt

Highly effective steam cleaners offer everything you could possibly want in terms of hygiene. The steam emerges in very fine drops and, depending on the machine type, at a temperature of around 100°C and a pressure of up to 8 PSI. You can clean walls, floors and toilets effectively, and the steam also reaches areas that are difficult to access such as rubber folds or crevices.

Sustainably clean

Particular care must be taken in sanitary facilities as it is likely that the various materials will have different reactions to the cleaning agent. This is why only basic/alkaline cleaning agents are used, allowing for gentle, eco-friendly and effective cleaning.

AP 100/50 M Multi-surface Cleaning Machine

Easily clean inside restrooms with this touchless compact cleaning machine, which dries surfaces in just one-third the time compared to traditional methods.

**ACHIEVING A LOT
WITH A LITTLE.**

Kärcher floor scrubbers make maintaining clean gymnasiums effortless. Their intuitive design allows custodial staff to quickly and effectively clean large floor surfaces, removing dirt, scuffs, and sweat with ease. This not only speeds up the cleaning process significantly compared to manual methods but also ensures a safer, slip-free, and more pleasant environment for students during sports and activities.

When it comes to school buses, Kärcher pressure washers offer a powerful yet easy-to-use solution. They blast away dirt and sanitize surfaces efficiently, drastically reducing cleaning time while ensuring a hygienic space.

With the right equipment, staff can easily maintain a consistently clean, safe, and welcoming atmosphere across diverse facilities. This equipment speeds up essential cleaning tasks, ensuring students can learn and thrive in a healthier environment.

School Custodian speaks about the KIRA robot being a game changer:

KIRA B 50 Robotic Scrubber

Intuitive operation and powerful sensors offers complete autonomy for high productivity and outstanding safety. Set the route and allow staff to focus on higher value tasks.
